Data Center Migration (DCM) Solutions

ALEX brings a suite of unrivaled migration tools that enable us to provide enhanced solutions that minimize risk & bring efficiencies to data center migrations.

ALEX understands the unprecedented challenges and demands that IT executives and professionals face today.

With the expansion of data center colocation services and capacity, the infusion of new information technology products and capabilities, and the advent of cloud computing options, the marketplace has seen explosive growth in data center consolidation, migration and transformation activity both in the federal government as well as in the commercial arena.

Our Data Center Migration (DCM) solutions are specifically and uniquely targeted to address the challenges of those emerging technologies.

We provide ...

Strategic Planning.
High-End Consulting

- ✓ IT Cost Reduction Initiatives
- ✓ FDCCI (Federal Data Center Consolidation Initiative) and other Regulatory Mandates and Requirements
- ✓ Business Operations Risk Mitigation Plans
- ✓ Modernized Data Center Operations Strategy and IT Infrastructure

Data Analytics.
Expertise & Tools

- ✓ Unrivaled, State-of-the-Art Migration Tools
- ✓ Graphical Dependency Mapping
- ✓ Automated, Web-Enabled Run Books
- ✓ Critical Disaster Recovery Planning Tool
- ✓ BIM/CAD Design Capabilities

Low Risk Execution.
Maximum Efficiencies

- ✓ Effective Application Migration Planning
- ✓ Business Continuity
- ✓ Efficient Utilization of Resources
- ✓ Reduced Overall Project Duration Time

Integrated Software Solution.

Ensuring the successful migration of IT Systems and Applications is one of the biggest risks and challenges. This is highly strategic and must be executed while maintaining business operations.

With the deployment of integrated, state-of-the-art, proprietary tools, we are able to effectively capture and store the pertinent data attributes about your systems and applications and generate comprehensive application dependency groupings.

Then, by leveraging the high-performance, analytical and execution capabilities of these tools, we are able to:

* Manage your data center asset inventory
* Create optimized application and system migration bundles
* Generate rack elevations and perform analysis of rack space and power
* Manage migration event execution in real time via automated, web-enabled "run books"

ALEX Data Center Migration Life Cycle.

Benefits Realized.

Among the many challenges faced by IT organizations when taking on a data center migration effort are: *Limited internal staff resources, budget constraints, pre-established timelines, and minimal migration experience.*

ALEX will utilize our proven DCM expertise, coupled with the extensive capabilities of our integrated software product, to realize the following benefits:

* Enhanced effectiveness and integrity of migration planning
* Minimized risk to interruptions in critical business operations
* Increased efficiency and reduced duration of migration execution
* Reduced load and impact on your internal staff resources

ALEX is the Perfect Fit for Your Future.

Our high-end consulting and technical support capabilities will provide solutions to put all the pieces together to help you successfully achieve the mission-critical goals and objectives of your data center migration project.

Our integrated DCM service offering is flexible and dynamic. We can provide a total end-to-end solution or a specific set of services that fit within one or more of the DCM Life Cycle phases.

As an established government contractor, we have ...

✓ Contracts with 13 Federal Agencies
✓ Dedicated Federal BD Team
✓ Dedicated Federal Contracts Manager
✓ Dedicated Federal Proposal Shop
✓ Experience Expanding Federal Contracts
✓ DoD Facility Clearance
